Camilo Rocha (Ed.)

Rewriting Logic and its Applications

16th International Workshop, WRLA 2026

Part of the European Joint Conferences on Theory & Practice of Software (ETAPS 2026)

Turin, Italy, April 11th & 12th, 2026.

Informal Proceedings

Preface

This volume contains the preliminary proceedings of the 16th International Workshop on Rewriting Logic and its Applications (WRLA 2026). Previous editions of the workshop were held in Asilomar (USA) 1996, Pont-à-Mousson (France) 1998, Kanazawa (Japan) 2000, Pisa (Italy) 2002, Barcelona (Spain) 2004, Vienna (Austria) 2006, Budapest (Hungary) 2008, Paphos (Cyprus) 2010, Tallinn (Estonia) 2012, Grenoble (France) 2014, Eindhoven (Netherlands) 2016, Thessaloniki (Greece) 2018, Dublin (Ireland) 2020, Munich (Germany) 2022, and Luxembourg (Luxembourg) 2024.

Rewriting logic is a natural model of computation and an expressive semantic framework for concurrency, parallelism, communication, and interaction. It supports the specification of a wide range of systems and languages across diverse application domains and it also exhibits desirable properties as a metalogical framework for representing logics. Over the years, several languages based on rewriting logic have been designed and implemented. The aim of this workshop is to bring together researchers with a shared interest in rewriting logic and its applications, providing a forum to present recent work, discuss future research directions, and exchange ideas.

WRLA 2026 was held on April 11–12, 2026, in Turin, Italy, as a satellite event of the European Joint Conferences on Theory & Practice of Software (ETAPS). A total of 15 submissions were received, covering a wide range of topics related to rewriting logic and its applications. Each submission was reviewed by at least three program committee members or additional reviewers. After extensive discussion, the program committee selected 11 papers for presentation at the workshop. A selection of the accepted papers will appear in the post-proceedings, to be published in the Springer LNCS series, following the tradition of previous editions of the workshop.

Sincere appreciation is extended to all authors who submitted papers to the workshop, the invited speakers, and those who contributed tutorials. Equal thanks are due to the members of the program committee and the external reviewers for their careful work throughout the review process. As in previous editions, the suggestions provided by the members of the WRLA steering committee were both valuable and greatly appreciated. Finally, deep gratitude is expressed to the local organizers of ETAPS 2026, whose efforts made this workshop possible.

April, 2026 Camilo Rocha

Table of Contents

Program Committee

Kyungmin Bae	Pohang University of Science and Technology (POSTECH), South Korea
Canh Minh Do	JAIST, Japan
Francisco Durán	Universidad de Málaga, Spain
Santiago Escobar	Universitat Politècnica de València, Spain
Nao Hirokawa	JAIST, Japan
Alexander Knapp	Universität Augsburg, Germany
Temur Kutsia	RISC, Johannes Kepler University Linz, Austria
Alberto Lluch-Lafuente	Technical University of Denmark, Denmark
Dorel Lucanu	Alexandru Ioan Cuza University, Romania
Salvador Lucas	Universitat Politècnica de València, Spain
Narciso Martí-Oliet	Universidad Complutense de Madrid, Spain
José Meseguer	University of Illinois at Urbana-Champaign, USA
César Muñoz	NASA Langley, USA
Kazuhiro Ogata	JAIST, Japan
Carlos Olarte	Université Sorbonne Paris Nord, France
Peter Ölveczky	University of Oslo, Norway
Carlos Ramírez	Pontificia Universidad Javeriana, Colombia
Adrián Riesco	Universidad Complutense de Madrid, Spain
Christophe Ringeissen	INRIA, France
Camilo Rocha	Pontificia Universidad Javeriana, Colombia
Rubén Rubio	Universidad Complutense de Madrid, Spain
Carolyn Talcott	SRI International, USA

Additional Reviewers

A
Arusoaie, Andreea-Valentina
